Contributing Through SMART Goals

#19451	Grade	Week 1	Week2	Week3	Week4
Student 1	9	Once the robot is finished, practice driving it today	I will continue to develop the logbook for	I will continue to improve and work on	Today I will continue to develop the logbook for 30 minutes and do odd jobs
Student 2	8	Today I will work to fix the driving problem with the drive base			Today I will realign the wheels on the drive base
Student 3	10	I will begin to sort out the new motors for the wheels today			ABSENT
Student 4	9	Today I will ask for access to logbook to continue working on it			Today I will work on drive base and make it stable
Student 5	9	Today I will work to fix the driving problem with the drive base	Today, I will continue to make the prototype spinner for the intake mechanism	Today, I will work on assembling the improved drive base	Today I will write a movement OpMode with Student 6
Student 6	9	Today I will start to code a movement OpMode	Today, I will continue making a movement OpMode	Today I will make a carousel spinner	Today I will make a movement OpMode with Student 5

Didn't get started

"It "As a whole we are more productive and as are
doisuch will improve our competitive ability" sion"

"I could see other people's SMART goals and realise
I could help them with what they were working on"

"If we don't complete a goal it will be recorded
and we will want to complete it next time"

"When we use SMART goals, we are focused on
" what we are doing, which boosts productivity"

A group of seven male students in light blue school shirts and dark grey trousers are gathered in a classroom. One student stands in the background wearing a blue polo shirt and a face mask. The other six students are sitting on the floor around a small, complex robot with various sensors and components. They appear to be focused on their work. The room has shelves with various supplies and a window with blinds in the background.
